

# **Dell Latitude E6540**

The most secure and manageable laptop is also the most powerful Latitude. You can count on the Latitude E6540 outstanding reliability for your workforce productivity.

### Most secure laptop

Data is your most valuable asset. Protect it with the most secure business laptop on the market. Latitude E6540 guards your data with industry-leading endpoint security solutions that include the most comprehensive encryption, strong authentication and leading-edge malware protection.

Protect data on any device, across external media and in the cloud with Dell Data Protection | Encryption. This comprehensive encryption solution suite enables centralized, remote management of endpoint security. Flexible encryption options range from simplified BitLocker management to the highest level of FIPS 140-2 protection commercially available for system disks with the optional DDP | Hardware Crypto Accelerator. Easily deploy encryption right out of the box with factory installation and simplify compliance with one-touch preset compliance templates.

Ensure only authorized users have access to your data with advanced authentication options including FIPS 201-certified smart card and fingerprint readers and RSA SecurID. Dell Data Protection | Security Tools enables multifactor, single sign-on and preboot authentication along with integrated management with your encryption policies. Only Dell Latitude E6540 provides a FIPS 140-2-certified TPM<sup>1.2</sup> for secure credential storage. Dell ControlVault adds another layer of hardware security by isolating user passwords and credentials on a separately controlled hardware chip for stronger protection from potentially unsecured operating systems and physical hard drives.

Stop advanced malware in its tracks with Dell Data Protection | Protected Workspace, a proactive approach to malware protection that automatically detects and blocks all malicious behavior in real time — even zero-day attacks. The software is completely unobtrusive to users so employee workflow is uninterrupted.

#### Most manageable laptop

Easily manage your Latitude fleet with exceptional integrated management capabilities that include Intel® vPro<sup>TM</sup> technology and exclusive automated tools that plug into Microsoft System Center and Dell KACE.

Remotely manage your Latitude laptops with next-generation Intel® vPro™ technology<sup>1</sup> and update once and everywhere with Dell-unique Intel vPro extensions for remote BIOS management and hard drive wipe, even when systems are powered off. Save time and eliminate guesswork with Dell automated tools and utilities for deploying, monitoring and updating systems. Collect inventory data, enforce policies, and maintain system health for the lifetime of your Dell Latitude laptops. Integration into Microsoft System Center and Dell KACE appliances offer efficient, centralized and automated management to help you save time and money.

Create a standardized environment and simplify deployments with long lifecycles, Dell ProSupport<sup>3</sup>, Dell Configuration and Deployment Services, and Dell Imaging Services.

## Outstanding reliability and performance

Get more done each day with a high-performance laptop designed to work fast and reliably. From its beefy Intel® Core™ i7 quad-core processor option to its 128-bit graphics processing option and fast boot with performance solid-state hybrid drive (SSHD) or solid-state drive (SSD) options, Latitude E6540 is designed to keep pace with your busy day. Dell also offers essential accessories recommended specifically for your Latitude E6540 to improve productivity whether in the office or on the go.

Swappable batteries enable long periods of productivity away from an outlet. Desk productivity is ensured with existing Latitude E-family docking solutions combined with Dell's UltraSharp monitors, wireless keyboard an mouse.

Connect and collaborate effectively with Dell docking solutions, Bluetooth® 4.0, integrated HD webcam and mobile broadband<sup>4</sup> options.

Travel and work with confidence knowing your Latitude E6540 features a business-rugged design. Its MIL-STD-810G-tested Tri-metal<sup>™</sup> chassis, anodized-aluminum exterior and powder-coated base combine for exceptional strength and lasting good looks. Dell Fast Response Free-fall sensor and rubber hard drive isolation help protect data from shocks and vibration. For added comfort and mobility choose Dell's Professional carrying case.

This 15.6" Latitude is small, lightweight (starting at 5.26 lbs.)<sup>5</sup> in its class and offers your choice of an anti-glare HD or Full-HD display. A backlit keyboard option enables productivity in low-light environments.
