

Dell Dock with Monitor Stand-DS1000

Spec Sheet

Single Cable Connectivity

Streamline your workspace with the Dell Dock with Monitor Stand. Featuring a powerful USB-Type C™ cable connection, you can quickly connect your laptop or tablet to a single data and power source. You'll also enjoy an easy, reliable connections from your laptop or tablet to dual FHD displays or a single 4K UHD display at 30 Hz, plus and all of your essential daily devices and accessories. It also has tilt and pivot features that allow you to adjust the display to a comfortable position. The Dell Dock with Monitor Stand supports VESA quick release on Dell E & P & UltraSharp series monitors sizes from 19" to 27" (Dell VESA Adapter Plate included in box for E-series monitor support).

Integrated Design with Superior Cable Management

The Dell Dock with Monitor Stand is compact in size—just 12.4x7.7x16.7inches (315x195x426mm)—and has one single power cable that connects both your dock and display to the wall. It also features cable management within the stand's tower, hiding unsightly cables from your view and out of your workspace. Place it virtually anywhere you work with your display — in your traditional office desktop or a shared hot desk — even if space is limited.

One dock for all

The Dell Dock with Monitor Stand is compatible with select Dell laptops, workstations, tablets and other compatible non-Dell devices with USB-Type C™ connectivity. Easily connect to displays, printers, a mouse, keyboard and audio devices through the Dell Dock with Monitor Stand from your compatible system of choice. It also supports features such as Wake on Lan, PXE Boot, MAC address pass through, and Dock firmware update, when used with compatible Dell systems. Please note, a system requiring more than 90 Watts must have its own power adapter attached.

Enhanced video performance

USB Type-C connectivity provides reliable, single-cable connectivity for high-quality performance that enables crisp, clear video, text and images. Expand productivity with peripherals

Other Features:

- Supports up to dual FHD displays, or single 4K UHD (30Hz) or QHD (60Hz) display.
